## AGE-PRO Guitar Echo

“Creating Yesterdays Echoes Today”

**amtech** has used the latest technology in the design and manufacture the worlds most versatile echo unit capable of fulfilling the demands of today's musicians and replicating all the vintage echoes of the past.

**AGE-PRO** Independent adjustments for both input sensitivity and line level ensures perfect matching between instrument and amplifier.

**AGE-PRO** Six pre-set echo patterns, One tap-selectable position and one user pre-set position ensure total coverage of any echo demand.

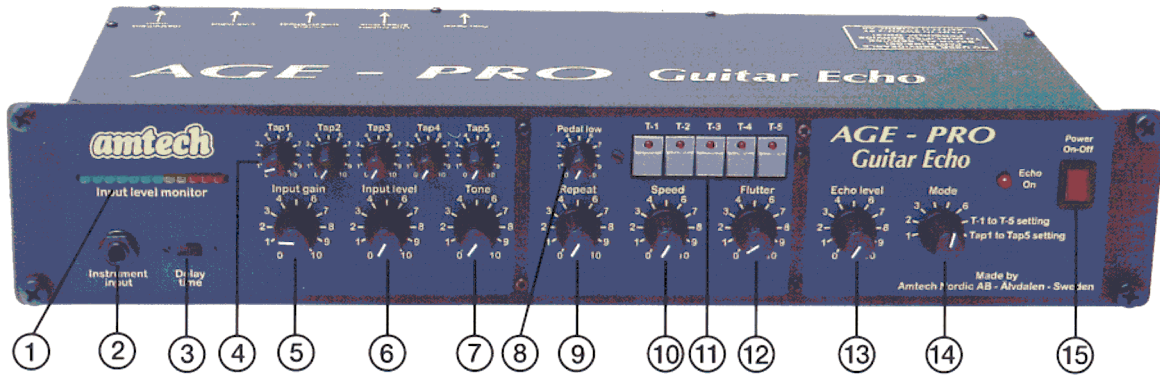

**AGE-PRO** Adjustable repeat and echo levels matches the echo sound to the studio, theatre or auditorium.

**AGE-PRO** Flutter control adds that "Vintage Echo" sound without the old problems of distortion and noise associated with earlier echoes.

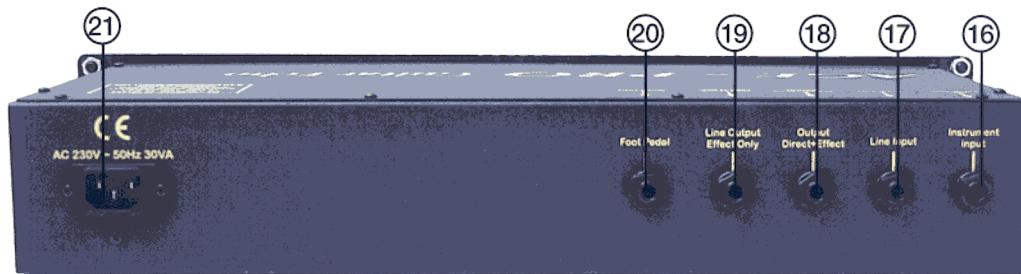

**AGE-PRO** Foot pedal for variable echo level with adjustable bypass setting.

All AMTECH-products are manufactured in Sweden

# CONTROLS

1. Input level LED's
2. Front instrument input socket (same impedance as rear socket 16)
3. Delay time to the first "tap"
4. Mode 8: Position individual level controllers for all five "taps"
5. Input gain to match instrument to AGE-PRO
6. Input level sets the volume of the signal to be processed
7. Tone control for repeated echoes
8. Pedal by-pass allows up to 25% echo "bleed" in minimum position
9. Repeat sets the number of times the whole echo is repeated
10. Speed controls the time interval between the echo "taps"
11. Mode7: Tap switches select individual five "taps" in any combination
12. Flutter control adds the pitch variation normally found with tape echoes
13. Echo level sets the volume of the echo compared to the instrument input level
14. Mode selects the six pre-set echo patterns, tap-selectable position & user pre-set position
15. Illuminated mains switch turns power on & off
16. Rear input socket for instrument or from amplifier effects loop circuit
17. Line input socket
18. Output socket: Direct and Effect
19. Output socket: Effect only
20. Foot pedal input socket
21. Mains lead input socket
